The Everyday Speech Curriculum in 5 Minutes

Duration: 4 min 44 sec

Everyday Speech: Social Skills Made Easy

Everyday Speech is a PK-12 **social skills curriculum** that offers evidence-based video modeling lessons, games, and worksheets that make teaching social, behavioral, and communication skills easy and effective.

Meet the rising need for social and behavioral support

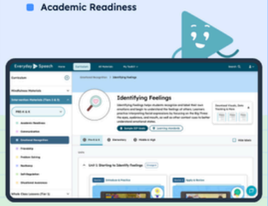

Student support specialists are managing heavier caseloads, while teachers are navigating more frequent behavioral challenges. Everyday Speech eases these burdens with MTSS-aligned materials across a wide variety of skills including:

- Emotional Recognition
- Self-Regulation
- Conversation & Communication
- Resilience & Problem-Solving
- Perspective-Taking & Self-Awareness
- Academic Readiness

A no-prep social skills curriculum that lightens the load on your staff

Everyday Speech has thousands of high-quality materials, organized into ready-to-teach units with a clear scope and sequence.

- Show skills in action with **evidence-based video modeling lessons**
- **Practice, apply, and review** with prompts, games, activities, and worksheets
- **Track progress and stay organized** with built-in tools

41% of users said that Everyday Speech **eliminated their prep time altogether**

71% reduction in prep time for educators

Funding for Everyday Speech

Everyday Speech is for all educators – special education, general education, and specialists. The curriculum's broad scope allows for a wide range of funding options for districts and schools. To streamline the purchasing process, we are providing a list of our current champion districts' most commonly used funding sources.

- **IDEA—Special Education Grants to States**
  The Individuals with Disabilities Education Act (IDEA) ensures that children with disabilities receive a free and appropriate education and can meet the same academic standards as other students.
- **Title I, Parts A, C & D**
  Title I provides financial assistance to schools with high numbers of poor and migratory children and prevents at-risk youth from dropping out of school to ensure that all children meet state standards.
- **Title II**
  Title II's purpose is to prepare and recruit high-quality teachers and principals to improve student success. This includes teacher preparation, recruitment, induction, professional development, and retention, as well as enhancing the skills and knowledge of principals for effective school leadership.
- **Title IV, Part A**
  Title IV supports LEAs in offering well-rounded education and fostering safe, healthy, supportive, and drug-free environments. It also helps LEAs implement mental health awareness training programs and expand access to school-based counseling and mental health programs.
- **Title VI, Part B**
  This allocates funds to two programs: the Small, Rural School Grant Program and the Rural and Low Income School Program.
- **Title VIII of the ESEA provides Impact Aid grants**
  Impact Aid provides grants to eligible school districts serving federally connected children on military bases, Indian lands, and in subsidized housing. Additional payments are made for federally connected children with disabilities, to be used for programs and projects to meet their special education needs.
- **Promoting Student Resilience**
  The Promoting Student Resilience program provides grants to an LEA or consortia of LEAs. The aim is to help them improve their ability to address the comprehensive behavioral and mental health needs of students in communities that have experienced significant civil unrest in the past 24 months.

These are just a few of the ways you can purchase Everyday Speech curricula. Our **Partnership Specialists** are ready to guide you through the process, provide details on additional funding sources, and explain how an Everyday Speech partnership can benefit your district.
